“

Waste and pollution are not accidents, but the consequences of decisions made at the design stage, where around 80% of environmental impacts are determined. - Ellen Macarthur Foundation

PLASTIC AND THE FUTURE

"It is expected that **global plastic production will double** between 2020 and 2050 to 800.000 milion ton per year..."

Source: NieuweOogst

"As far as we know, plastics in the European agraricultural industry are **collected for 63 procent** and **24 procent is being reused**"

Source: Wouter Post, WUR

"In Europe, for example, **only 30% of the 25,8 milion ton** produced plastic waste is being **recycled**"

Source: Natuur en Milieu Federatie Zuid Holland
